

ACUTE REHABILITATION FOR THE "INDUSTRIAL ATHLETE"

Revolution offers the injured worker quick and easy access to high quality physical therapy. We focus rehabilitation towards return to work, with personalized care.

Early rehabilitation should begin within days of injury. Medical studies indicate that immediate care of an injury; decreases pain, improves flexibility / motion, and allows the "Industrial Athlete" to return to work safely and efficiently.

Without a delay in the rehabilitation process; chronic pain, stiffness, decreased range of motion and reduced strength are all avoided.

Revolution offers a hands on approach with skilled physical therapists providing the care. You will receive timely and regular updates with 24/7 access to your clients charts and billings. Our physical therapist's will discuss the patient's care with you regularly, to provide open communication for a positive outcome of each case.

Revolution is owned by physical therapists providing professional patient centered rehabilitation!

FUNCTIONAL CAPACITY EVALUATIONS

THE REVOLUTIONARY DIFFERENCE

- *Immediate scheduling*
- *Phone call within 24-hours with Functional Capacity Evaluation (FCE) results*
- *Written reports within 48-hours*
- *Secure access to patient's charts and billings available anytime through a cloud based software*

Revolution utilizes the Matheson FCE which is the most scientific, standardized and evidence based FCE available.

THE QUALITY OF THE MATHESON FCE

When the US Army required advice on establishing practice standards for the FCE, they came to Matheson.

The Insurance Company of British Columbia lists the Matheson FCE as the "gold standard."

The Matheson FCE is accepted in the highest courts in both the United States and Canada.

Revolution's Matheson-trained evaluators are able to answer specific referral questions and customize the FCE to the needs of the case, while focusing on resolution.

An FCE is both a Baseline indicator and a Return to Work determinant. Certified evaluators determine a patient's maximum physical capabilities and ability to return to the workplace. Results are fair, accurate and objective.

RETURN TO WORK... a *Revolutionary Approach*

With over 35 years of experience returning injured workers safely, quickly and permanently to the work place... the *Revolutionary Approach* is unique.

After a work injury the "Industrial Athlete" experiences a multitude of changes:

- Acute injury becomes chronic
- De-conditioning occurs
- Weight gain begins and escalates
- Poor eating habits form
- Negative lifestyle adopted

Revolution incorporates a scientific and personalized process, initiating a Return to Work focus on the first day of acute care rehabilitation. 24- hour easy and secure access to the patients' chart through a cloud based software for complete transparency

The Industrial Athlete not only receives the best in class orthopedic rehabilitation with a Physical Therapist, in addition, a team of healthcare professionals will enhance the Return to Work process:

- Exercise Physiologist through a personalized exercise regimen based on scientific Biomarker Testing
- Registered Dietician to educate in proper eating habits, as a fit worker will return to work faster and safer
- Clinical Psychologist / Social Worker to assist in positive lifestyle changes focusing on return to work

Industrial Athletes aspire to Return to Work. They simply require the Revolutionary Approach

REVOLUTION RETURN TO WORK PROGRESSION OPTIONS
